12 m = 120 cm  
10 m = 100 cm  
9 m = 90 cm  
6-8 m = 80 cm

Fill the base with  
5 cm of gravel

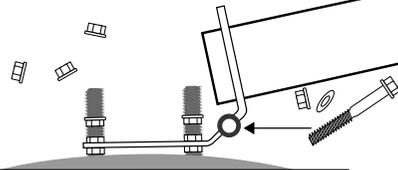

Place the mount on a board  
2 cm above the edge of the  
hole. Fill with concrete.

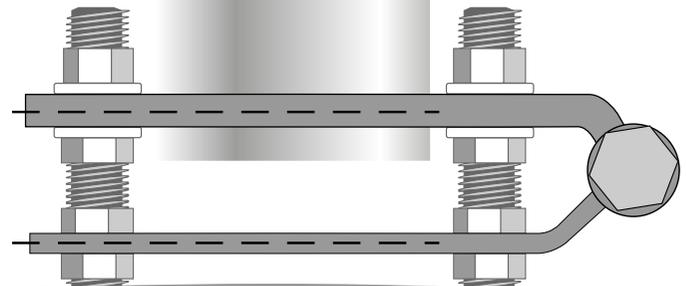

Let the concrete dry,  
then remove the board.

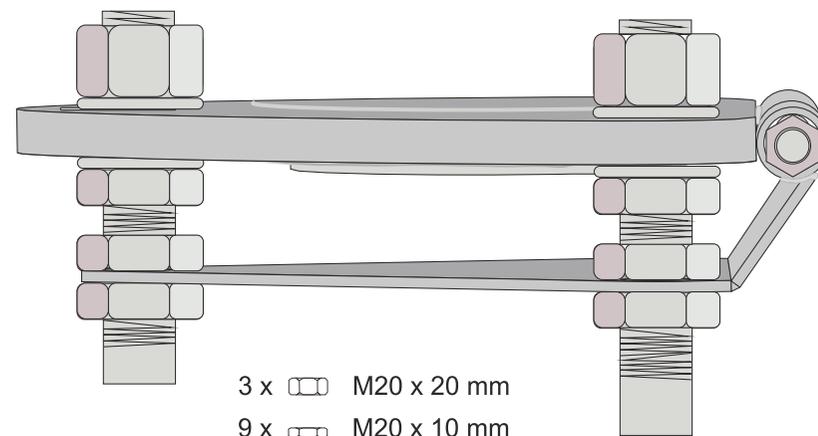

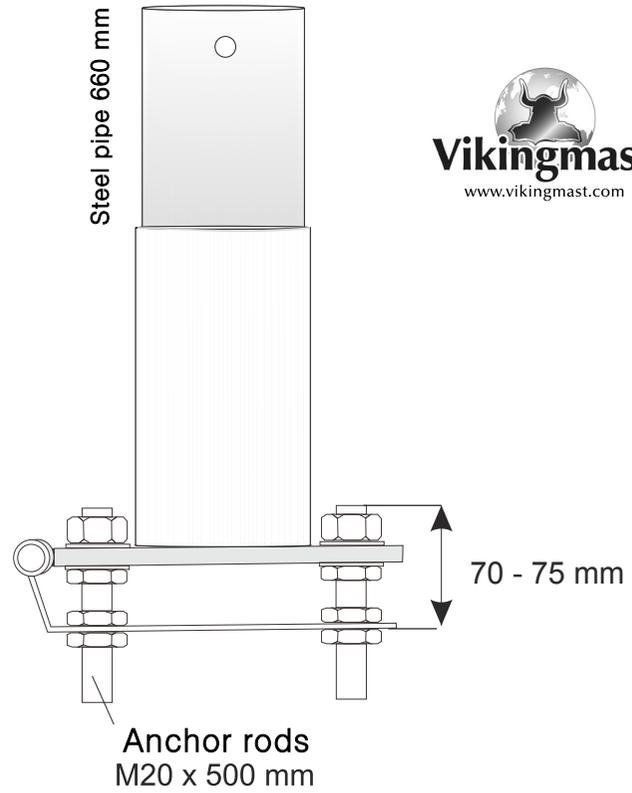

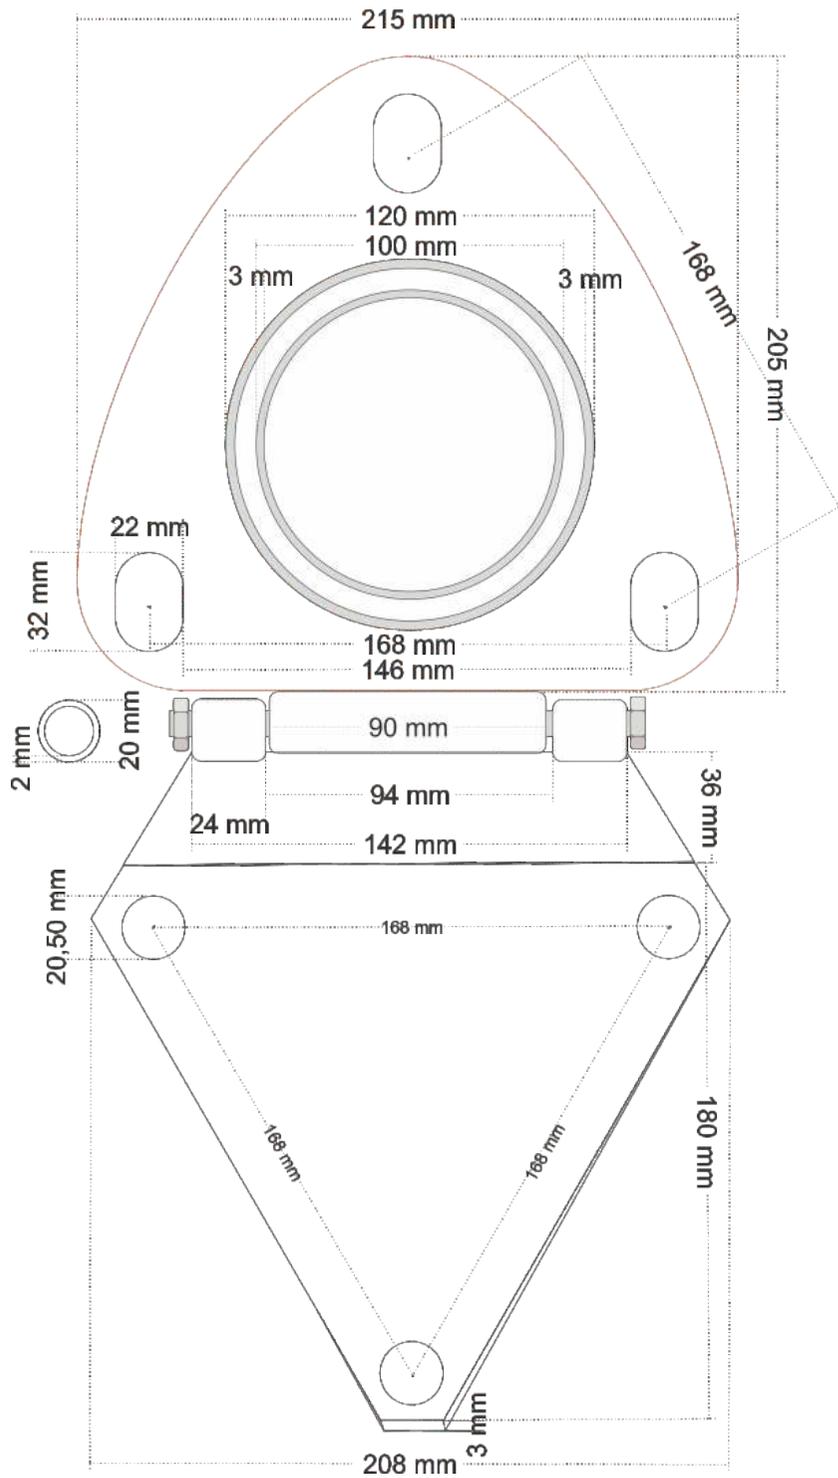

Attach the rod to the  
hingeplate, raise the flagpole  
and tighten the nuts.

Adjust the nuts so that the  
flagpole is straight.  
Tighten the nuts after one month.
